

Things I can do at home

Summer 1

Think about a place that is special to you. Where is that special place and why is it special to you?

Be a nature detective and explore your garden or a park.

Upcycle your rubbish and create something special e.g. your favourite animal!

Talk about the places/countries you have visited. What did you see? What did you like about it?

Bring into class, a photo or two to show your favourite place.

Summer 2

Ask your child to share with you, their special memories.

Share photos in school of their special times.

Can they remember their first day at school?

Talk about how they have changed over the past year.

Visit a local park or the seaside and talk about the things that you see or find.

Look out for caterpillars and butterflies in your environment.

On a sunny day, look for shadows. You could use chalk to draw round your own shadow!

Learn a summer time poem and perform it to the class!

Visit a garden centre and look for flowering plants. Can you name any of them?

During bath time explore objects that sink or float.
