

Living things and their habitat

Concepts		Core Vocabulary			
Classification	Environment	Habitat	Microhabitat	Consumer	Predator

A great Scientist...

- develops scientific knowledge and conceptual understanding through all aspects of science.
- develops understanding of the nature, processes and methods of science through different types of science enquiries that help them to answer scientific questions about the world around them.
- is equipped with the scientific knowledge required to understand the uses and implications of science, today and for the future.

Science Knowledge

I can explore and compare the differences between things that are living, dead, and things that have never been alive

I can identify that most living things live in habitats to which they are suited and describe how different habitats provide for the basic needs of different kinds of animals and plants.

I know that plants and animals depend on each other in habitats to survive.

I can identify and name a variety of plants and animals in their habitats, including microhabitats

I can describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food

Science Skills

I can observe closely, using simple equipment

I can use my scientific skills to identify or classify items
